

# Activer l'inscription automatique dans Intune

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll#enable-windows-10-automatic-enrollment>

Dans le cas de PC Hybrid AD Joined, il faut créer une GPO Ordinateur :

RN-FP-O-IntuneEnroll		
Data collected on: 3/14/2023 9:40:20 PM		<a href="#">show all</a>
General		
Details		<a href="#">hide</a>
Links		<a href="#">show</a>
Security Filtering		<a href="#">show</a>
Delegation		<a href="#">show</a>
Computer Configuration (Enabled)		
Policies		<a href="#">hide</a>
Administrative Templates		<a href="#">hide</a>
Policy definitions (ADMX files) retrieved from the central store.		
Windows Components/MDM		<a href="#">hide</a>
Policy	Setting	Comment
<a href="#">Enable automatic MDM enrollment using default Azure AD credentials</a>	Enabled	
Select Credential Type to Use: User Credential		
MDM Application ID:		
MDM Application ID represents the ID of your MDM application that is configured in Azure AD. This is optional and only required for automatic MDM enrollment using device credentials when multiple MDM applications are configured in Azure AD.		

Inutile de remplir l'ID d'application dans notre cas.
