

# Usage Location

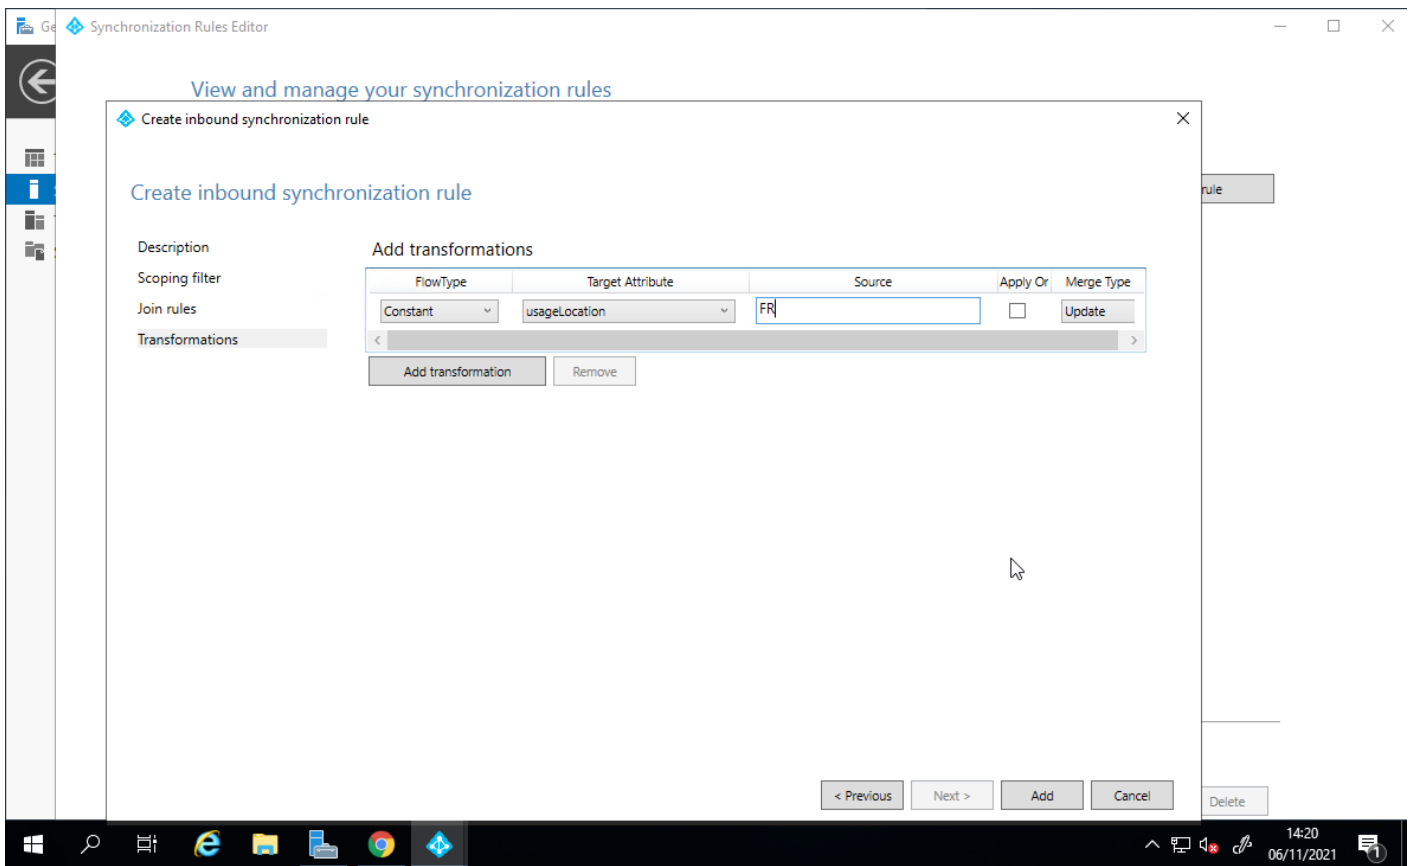

Dans Synchronization Rules Editor, on crée une règle Inbound.

The screenshot shows the 'Synchronization Rules Editor' window with a 'Create inbound synchronization rule' dialog box open. The dialog has a sidebar on the left with tabs: 'Description' (selected), 'Scoping filter', 'Join rules', and 'Transformations'. The main area contains the following fields:

Field	Value
Name	In from AD - User Usage Location
Description	
Connected System	khroners.fr
Connected System Object Type	user
Metaverse Object Type	person
Link Type	Join
Precedence	99
Tag	
Enable Password Sync	<input type="checkbox"/>
Disabled	<input type="checkbox"/>

At the bottom of the dialog are buttons: '< Previous', 'Next >', 'Add', 'Cancel', and 'Delete'.

Dans la prochaine page, on clique sur "Suivant". Idem sur la suivante.
