

Ajouter une métrique

Dans "Group" on sélectionne le groupe, puis l'hôte dans "Host". On choisit ensuite le type de métrique puis l'item.

A droite, on customise comme l'on souhaite.

Pour les graphes, on peut modifier l'échelle.

The screenshot shows the 'Axes' configuration panel in Grafana. The 'Left Y' section is expanded, showing the following settings:

- Show**: A toggle switch that is currently turned on.
- Unit**: A dropdown menu set to 'Percent (0-100)'.
- Scale**: A dropdown menu set to 'linear'.
- Y-Min**: A text input field set to '0'.
- Y-Max**: A text input field set to '100'.
- Decimals**: A text input field set to 'auto'.
- Label**: A text input field that is currently empty.

On peut rajouter des seuils.
