Config

Signed

Grafana Labs checks each plugin to verify that it has a valid digital signature. Plugin signature verification is part of our security measures to ensure plugins are safe and trustworthy.

[Read more about plugins signing](#)

Zabbix Plugin Config

Enable

Version
4.1.2

Includes

- Zabbix data source
- Problems panel

Dependencies

- Grafana 7.3

Enable ☐

Other

Disable acknowledges for read-only users ☐

(PS : pour la sécurité, il faut avoir un compte dans Zabbix dédié à Grafana, avec accès à l'API et aux hôtes via les permissions)

Et pour le port, si définit dans le docker-compose :

ports:

- 8090:8080

Il faut mettre le port 8080.
