

# Paramétrage via l'interface web

The screenshot shows a web browser window with the address bar displaying `https://10.1.1.254/`. The browser tab is titled "pfSense - Login". The page features the pfSense logo in the top left and a "Login to" link in the top right. The main content area has a dark blue background with the text "SIGN IN" in white. Below this, there is a white input field containing the text "Password". At the bottom of the form is a green button labeled "SIGN IN".

» Next

## General Information

On this screen the general pfSense parameters will be set.

Hostname

EXAMPLE: myserver

Domain

EXAMPLE: mydomain.com

The default behavior of the DNS Resolver will ignore manually configured DNS servers if servers directly. To use the manually configured DNS servers below for client queries, vi enable DNS Query Forwarding after completing the wizard.

Primary DNS Server

Secondary DNS  
Server

Override DNS

☐

Allow DNS servers to be overridden by DHCP/PPP on WAN

» Next

## Time Server Information

Please enter the time, date and time zone.

**Time server  
hostname**

Enter the hostname (FQDN) of the time server.

**Timezone**

» Next

On vérifie ensuite les informations puis on clique sur "Reload".
