

Installation de GLPI

Dans le gestionnaire de paquets, on télécharge GLPI.

The screenshot shows a window titled "Centre de paquets" (Package Center) with a search bar containing "GLPI". On the left sidebar, there are buttons for "Installé", "Tous les paquets", and "Paquets bêta". The main area displays the GLPI package details, including the INDEPNET logo, the package name "GLPI", the version "Entreprise", and an "Installer" button. The download count is "Nombre de téléchargement : 398872". Below this, a preview of the GLPI web interface is shown, featuring a navigation menu with "Inventory", "Assistance", "Management", "Tools", "Administration", "Setup", and "Settings". The main content area of the preview shows a "Welcome glpi, this is the central console." message and two tables: "Your tickets in progress" and "Your pending Tickets".

Requester	Item	Description

Le NAS installera donc GLPI ainsi que tous ses prérequis.

Lors de l'installation de GLPI, le centre de paquets exécute automatiquement la ou les opérations suivantes, voulez-vous continuer?

Installer Web Station

Installer MariaDB 10

Installer PHP 7.3

Installer Apache HTTP Server 2.2

Oui

Non

On peut accéder au GLPI via l'adresse IP du NAS. On peut par exemple créer un ticket.
