

Installer Veeam ONE 12

On télécharge l'ISO sur le site de Veeam.

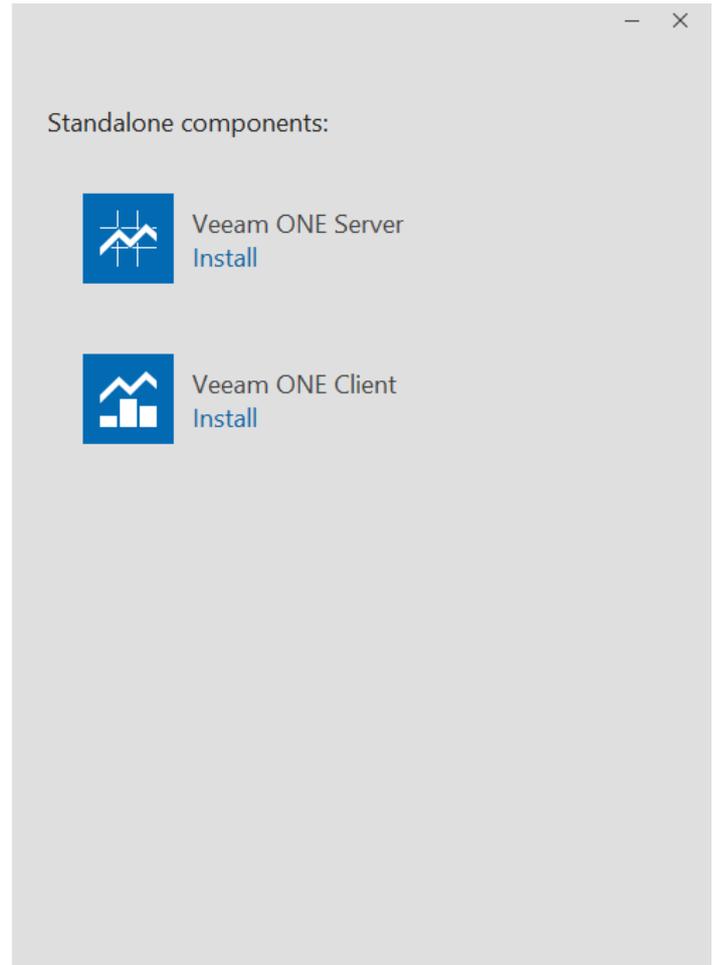

On exécute le setup présent sur l'ISO.

On clique sur "Install".

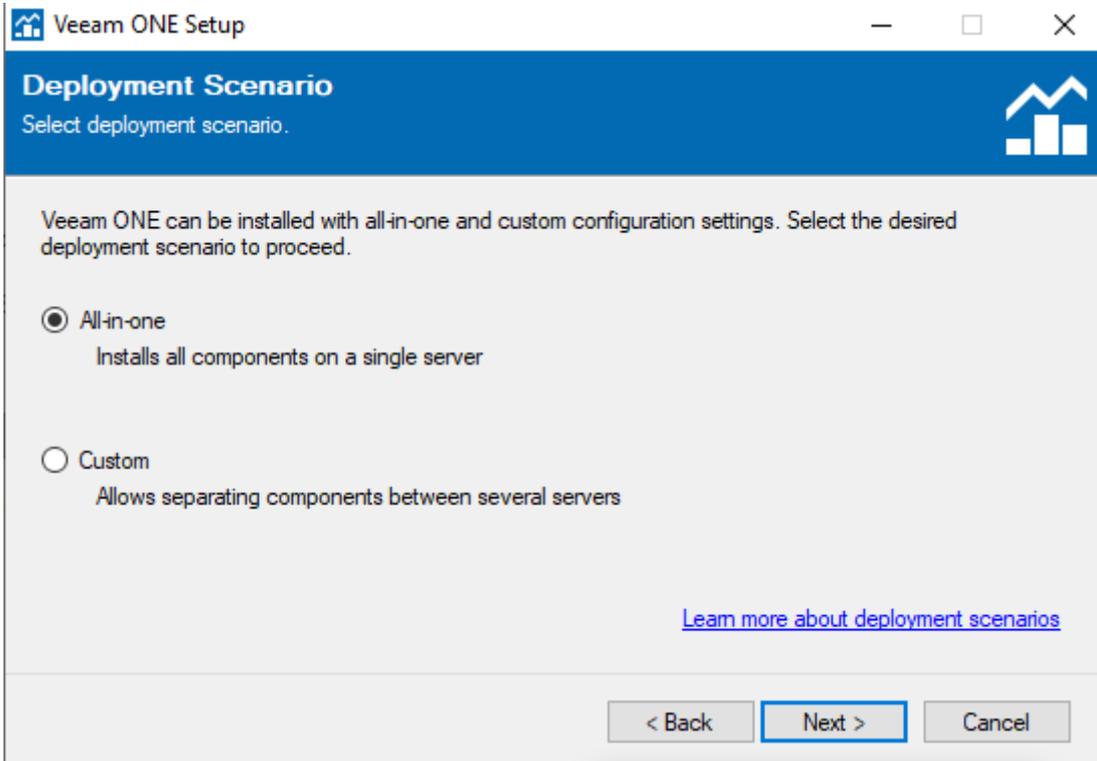

Veeam ONE 12

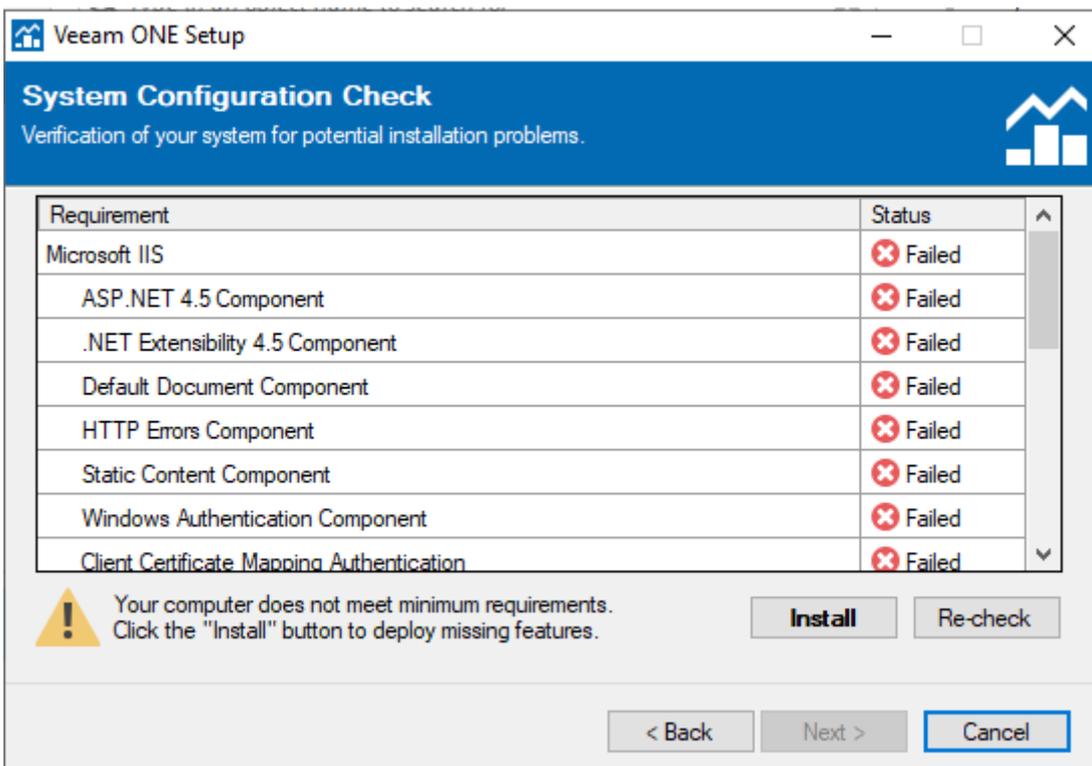

© Veeam Software Group GmbH. All rights reserved.

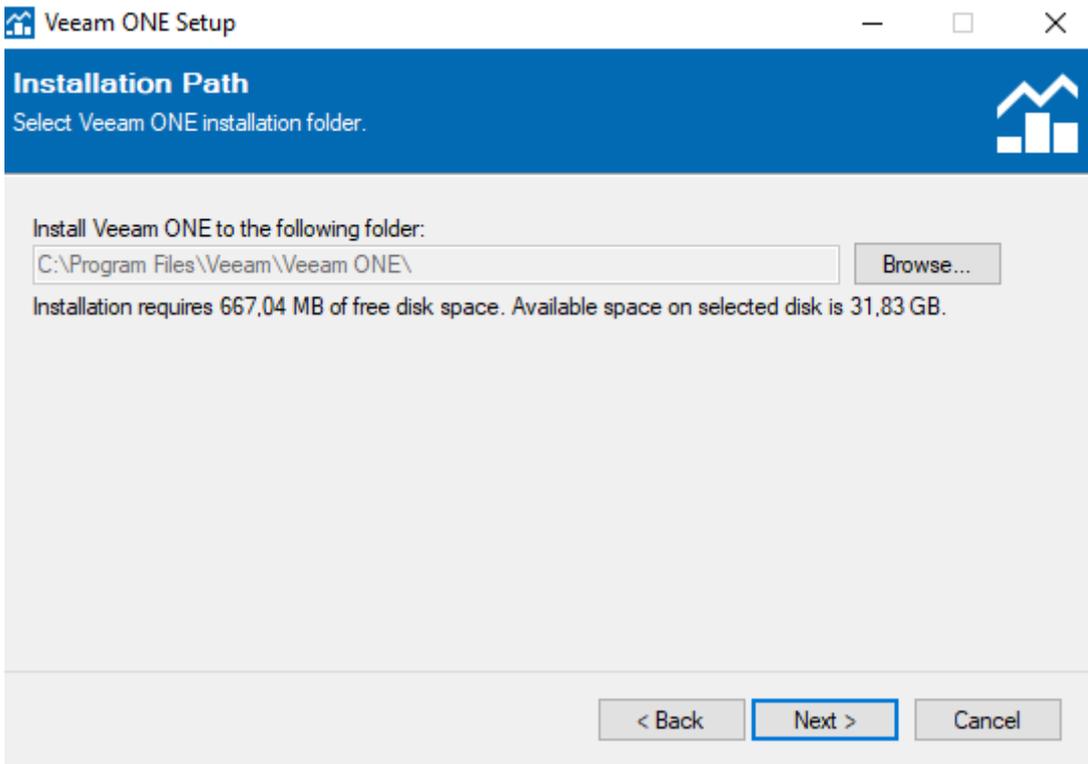

Si on nous demande d'installer les C++, on accepte. On clique ensuite sur "Accept", on choisit "All-in-one" et "Next".

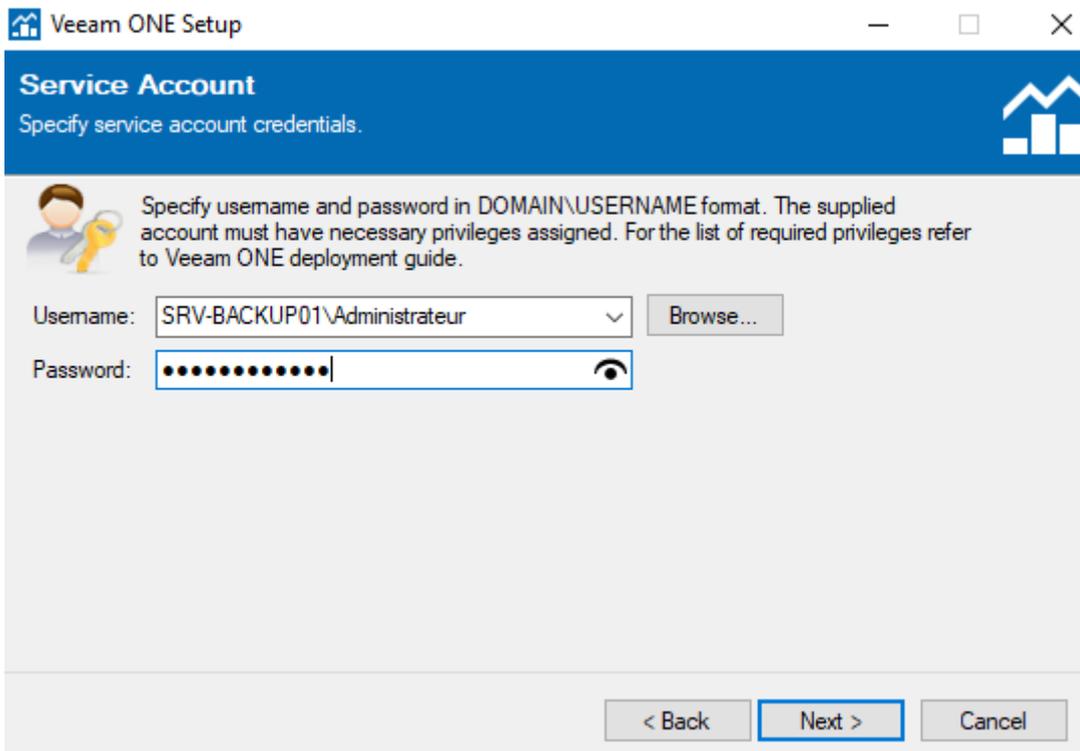

Une vérification des prérequis s'effectue. On peut les installer en cliquant sur "Install".

On choisit notre l'emplacement.

on rentre le compte de service. En production, il faut créer un compte dédié à ce service.

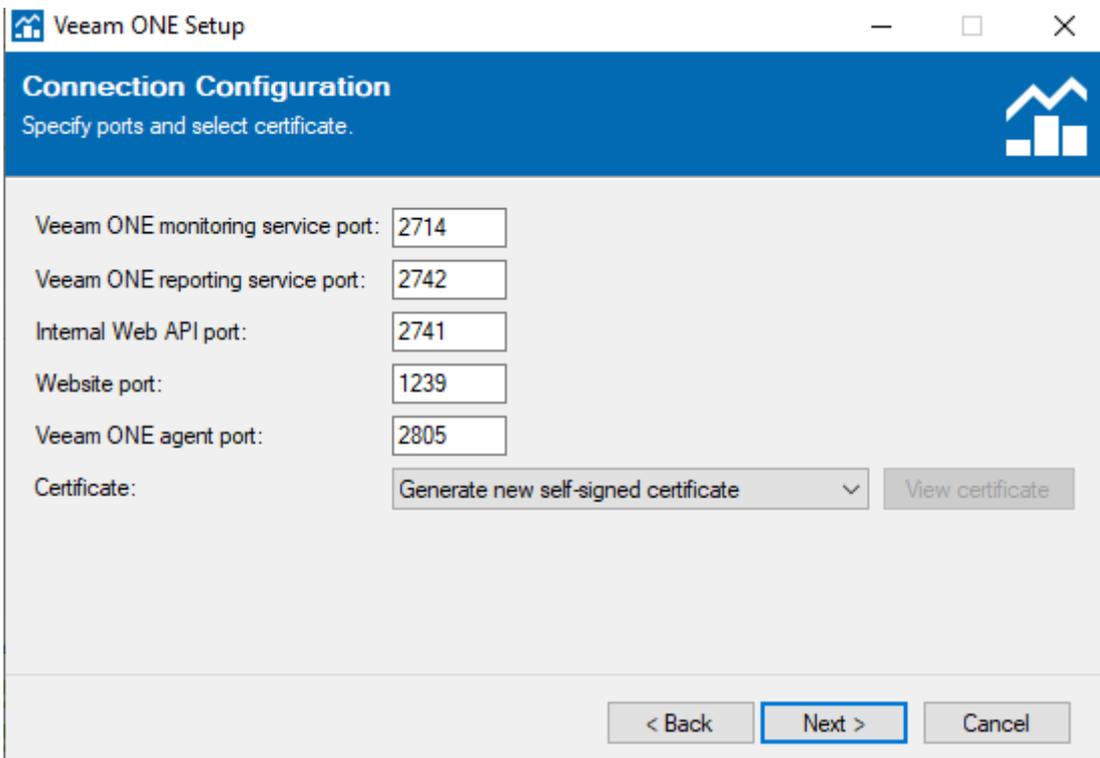

Si l'on a un serveur SQL dédié, on peut l'utiliser.

The screenshot shows the 'SQL Server Instance' step of the Veeam ONE Setup. The window title is 'Veeam ONE Setup'. The header bar is blue with the text 'SQL Server Instance' and a sub-instruction: 'Select SQL Server instance to create Veeam ONE database on.' There is a bar chart icon in the top right corner. The main area contains two radio button options: 'Install new instance of SQL Server (localhost\VEEAMSQL2017)' (selected) and 'Use existing instance of SQL Server (HOSTNAME\INSTANCE)'. Below the second option is a dropdown menu showing 'SRV-BACKUP01\VEEAMSQL2016' and a 'Browse...' button. Below that is a 'Database name:' field with 'VeeamONE' and another 'Browse...' button. A section titled 'Connect to SQL Server using' contains two radio button options: 'Windows authentication credentials of service account' (selected) and 'SQL Server authentication using the Login ID and password below:'. Under the second option are 'Login ID:' and 'Password:' fields, with 'sa' entered in the first. At the bottom are '< Back', 'Next >', and 'Cancel' buttons.

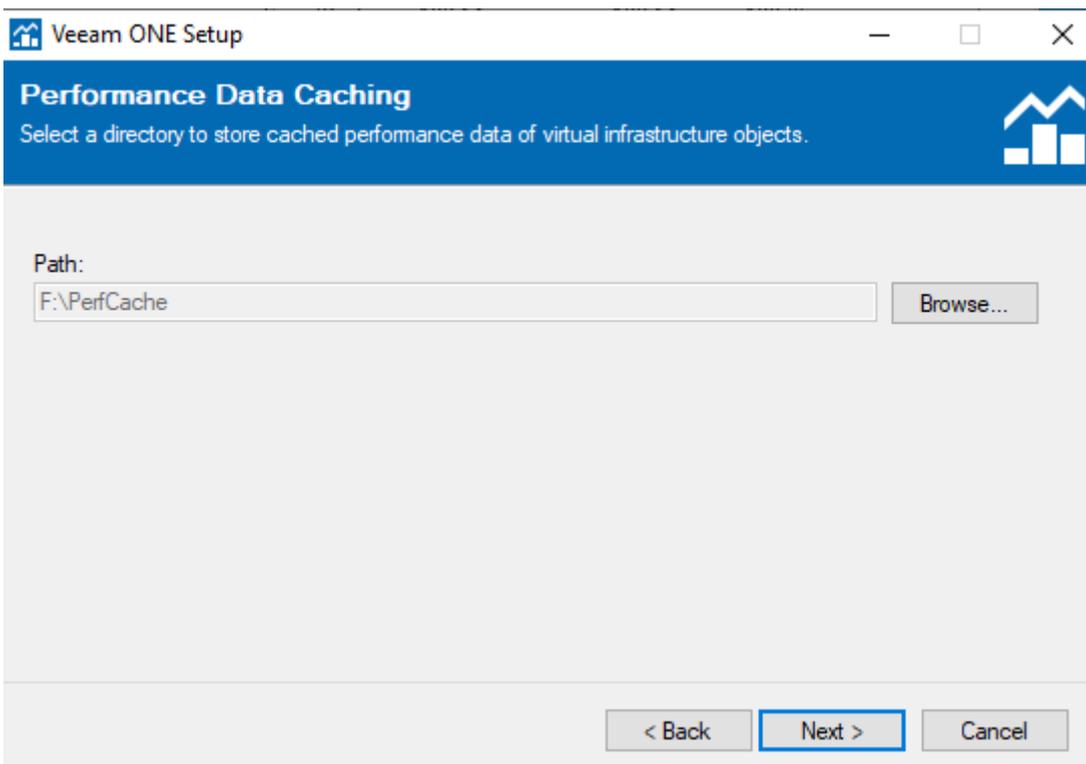

Si on a une licence, on peut la rentrer ici.

The screenshot shows the 'Operation Mode' step of the Veeam ONE Setup. The window title is 'Veeam ONE Setup'. The header bar is blue with the text 'Operation Mode' and a sub-instruction: 'Select operating mode and provide a license file.' There is a bar chart icon in the top right corner. The main area is titled 'Operating mode:' and contains two radio button options: 'Licensed mode (full functionality)' and 'Community Edition (limited functionality)' (selected). Below the first option is a 'License file:' field and a 'Browse...' button. Below the second option is a checked checkbox for 'Update license automatically (enables usage reporting)'. Below this is a paragraph of text: 'Download and install new licenses automatically when you renew or expand your contract. This requires sending the license ID, the installation ID, and workload usage counters to the Veeam licensing servers periodically. Successful usage reporting doubles the number of workloads you can exceed your installed license by.' Below the text is a blue link: '[Learn more about product editions](#)'. At the bottom are '< Back', 'Next >', and 'Cancel' buttons.

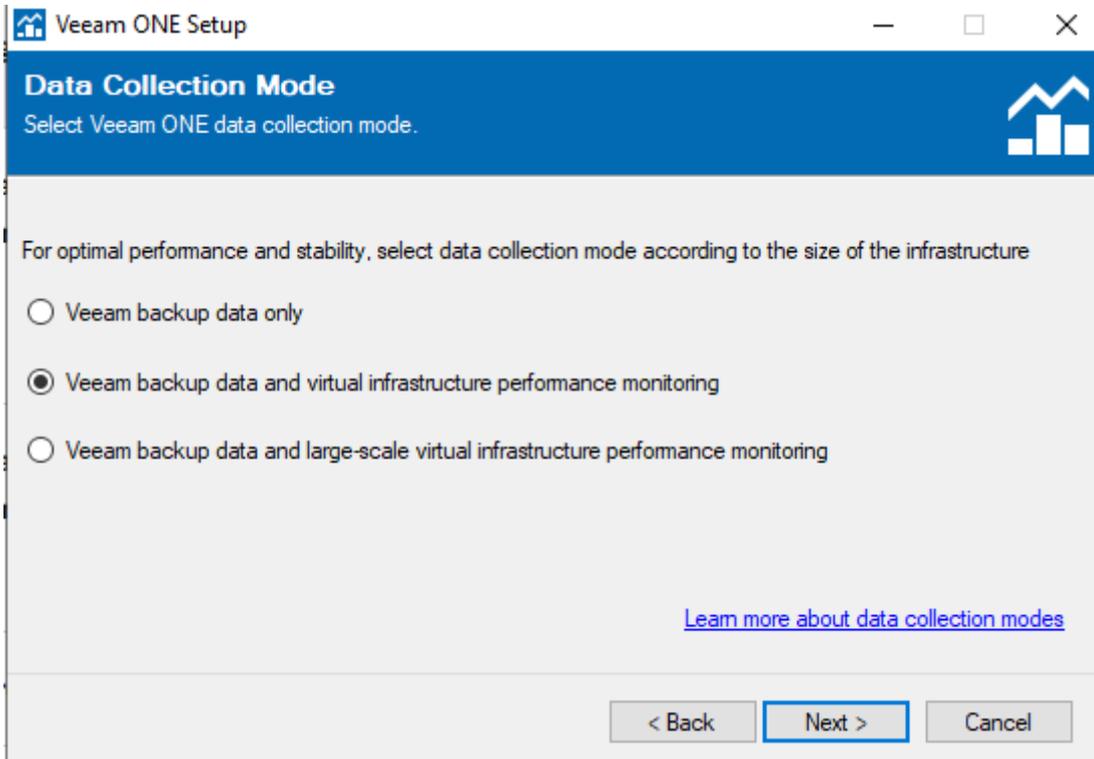

On peut utiliser un certificat existant ou en créer un (auto-signé).

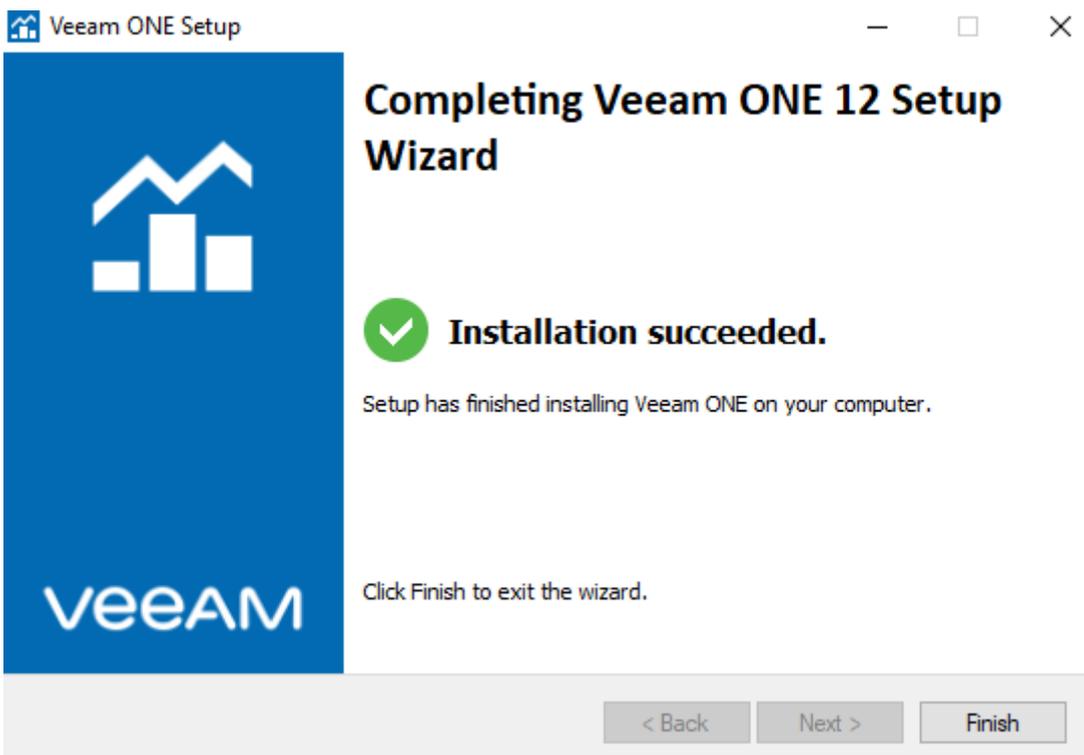

On définit le chemin du cache.

On peut choisir le mode de récupération de données.

On vérifie et on clique sur "Install".

Un redémarrage est demandé.
