Installer ESXi 8 sur ESXi 7

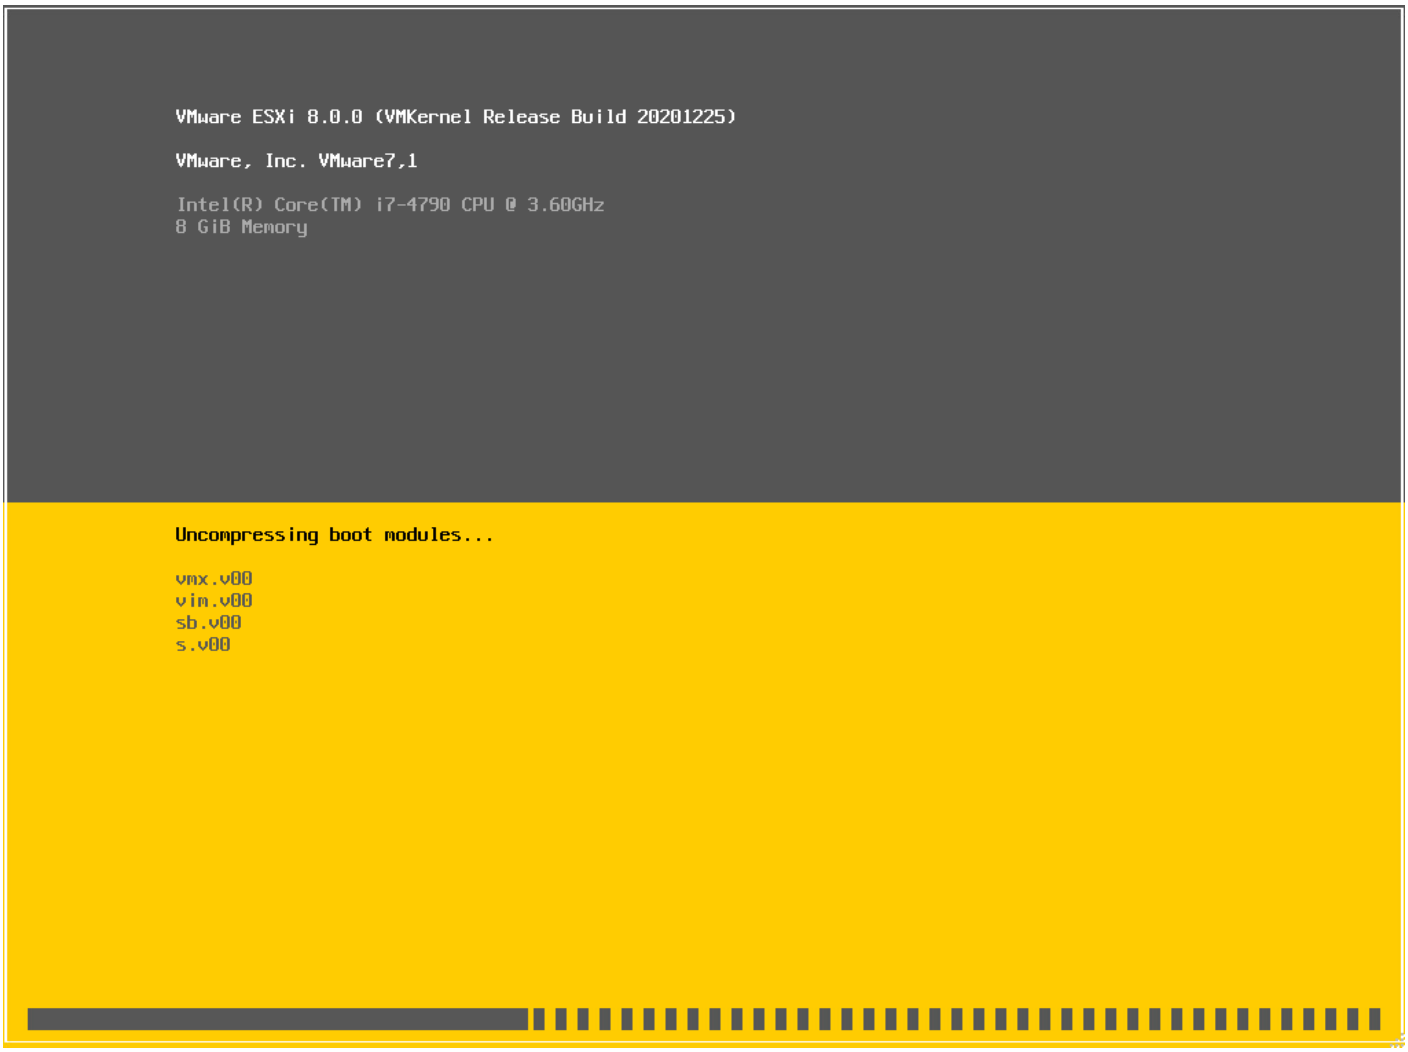

Comme pour VMware Workstation, on ajoute un disque dur et une carte réseau.

On démarre la VM.

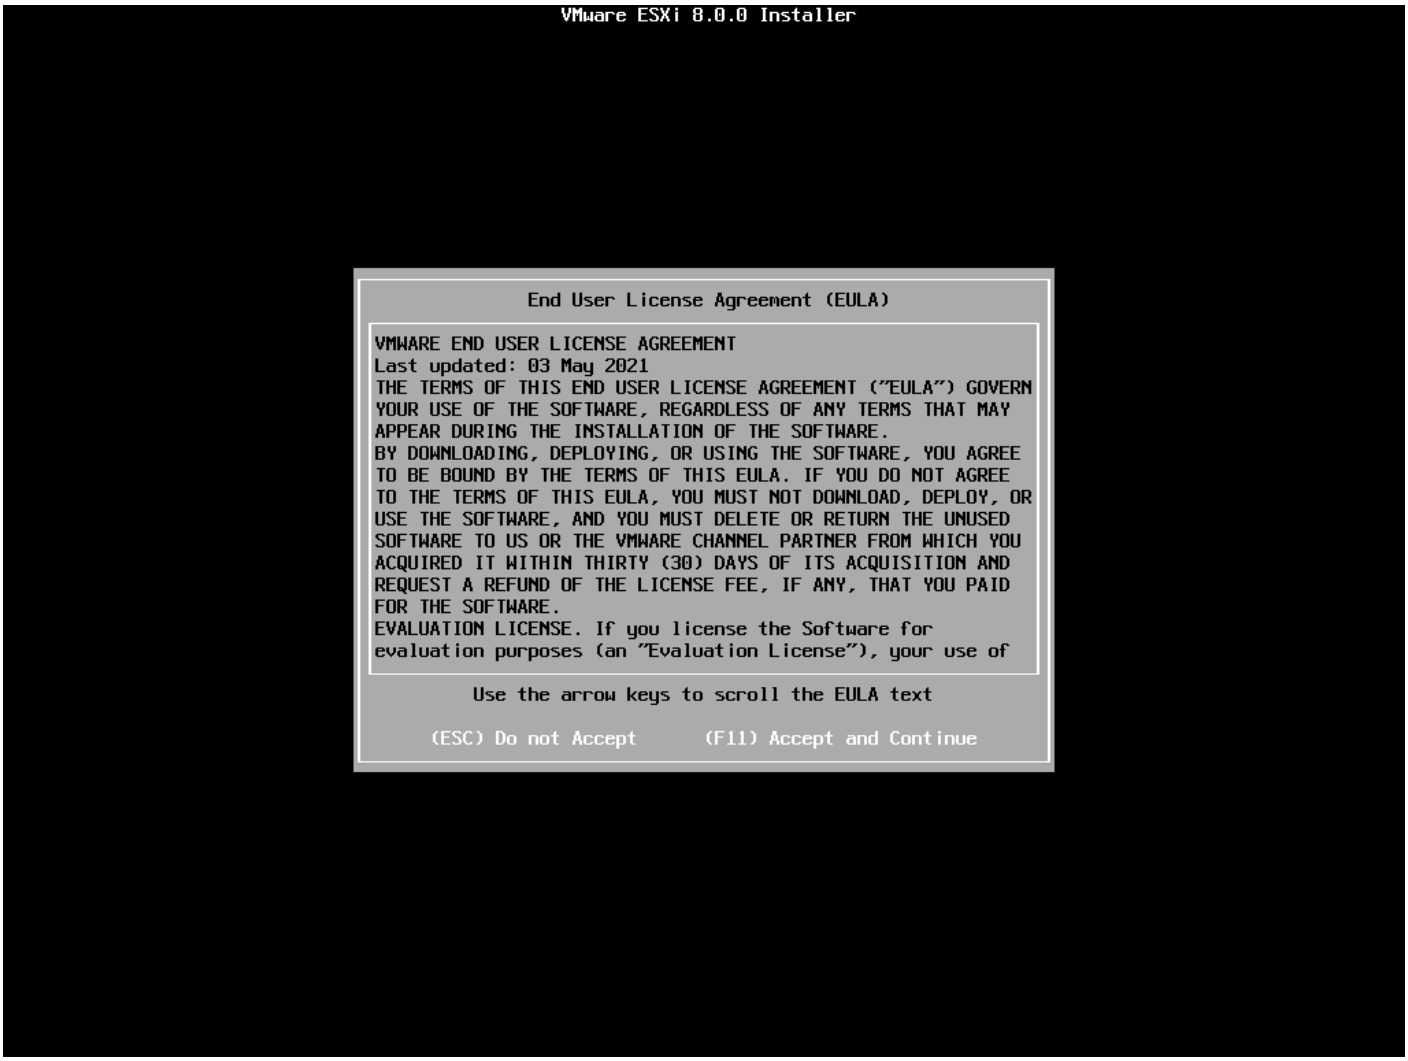

Loading ESXi installer
Loading /EFI/BOOT/boot.cfg
<ENTER: Boot>
<SHIFT+O: Edit boot options>
Automatic boot in 4 seconds...

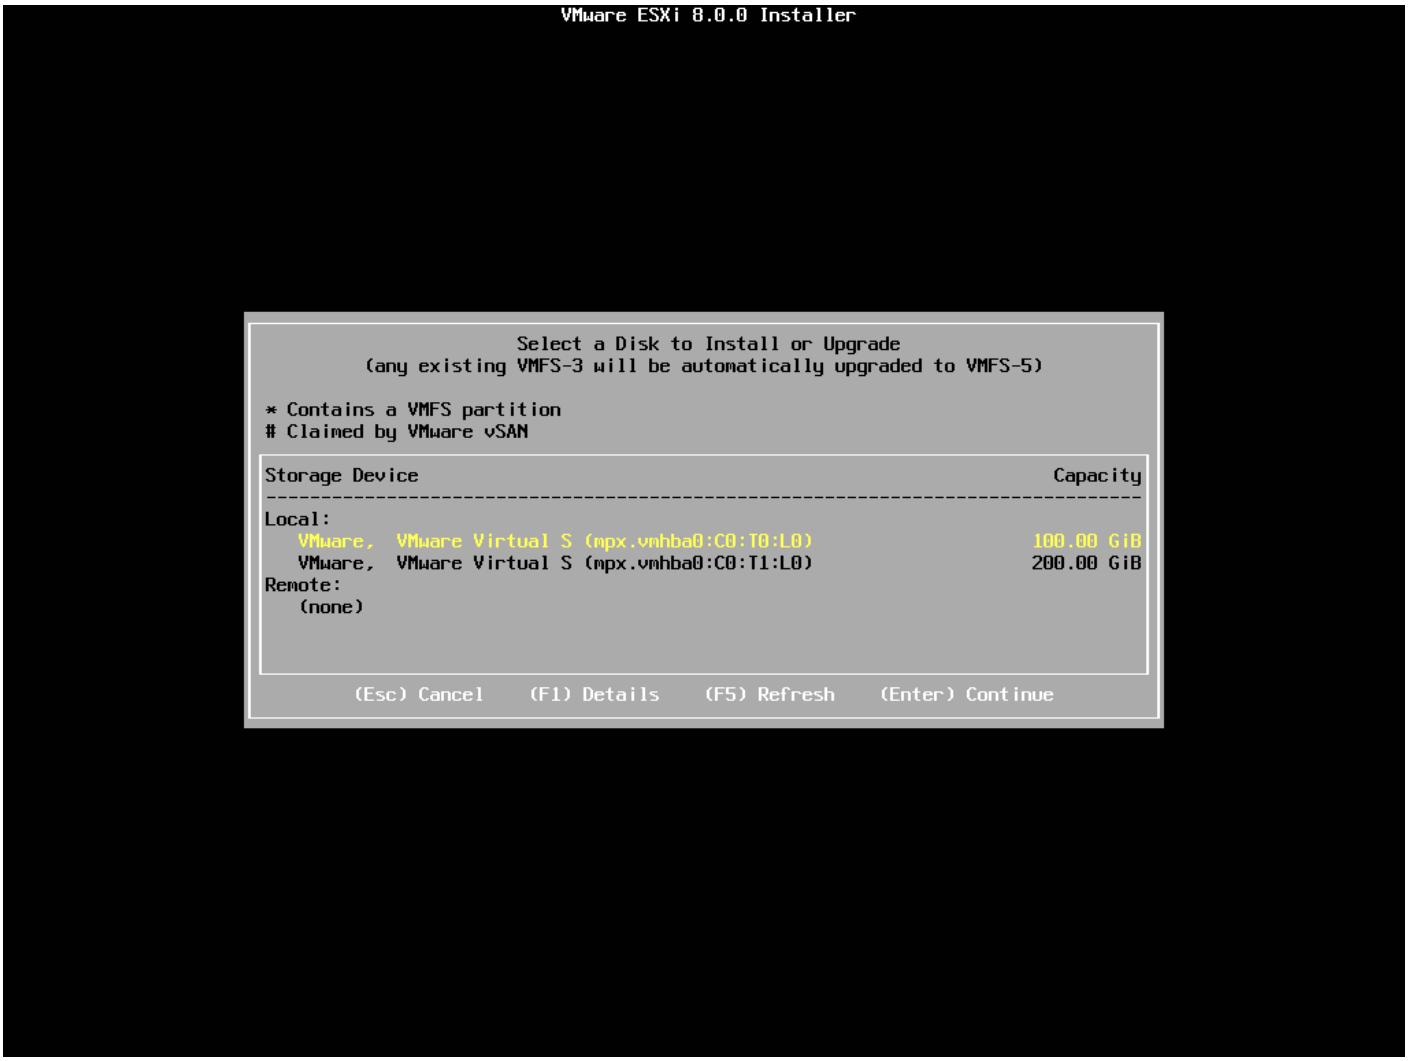

On presse entrer.

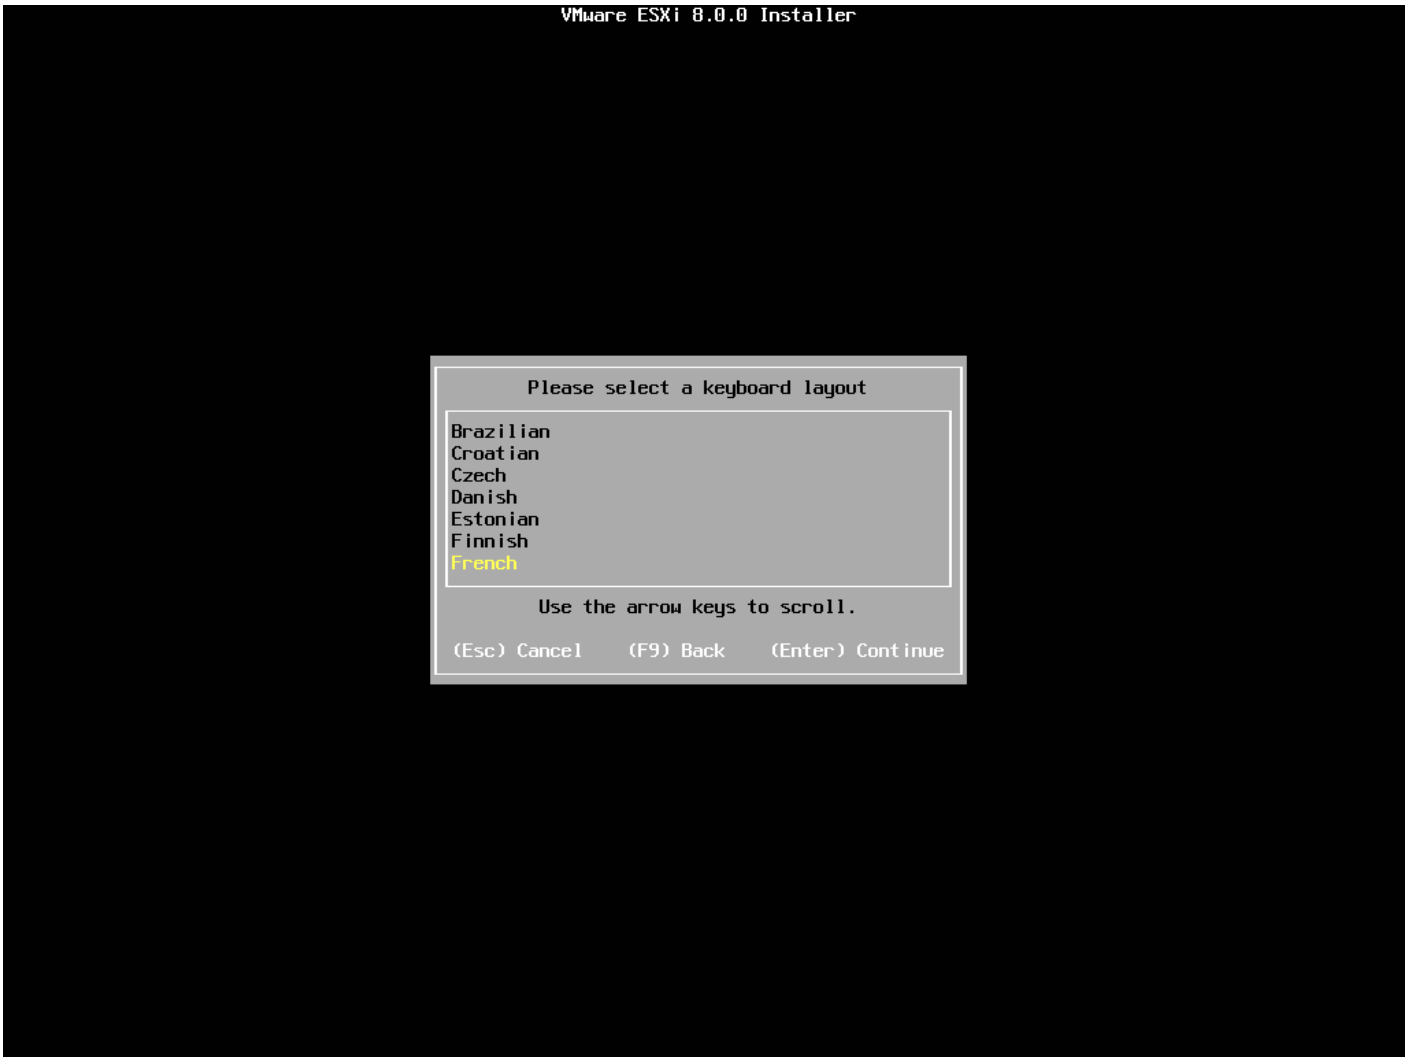

On lit et accepte les termes EULA.

On sélectionne notre premier disque en pressant entrer.

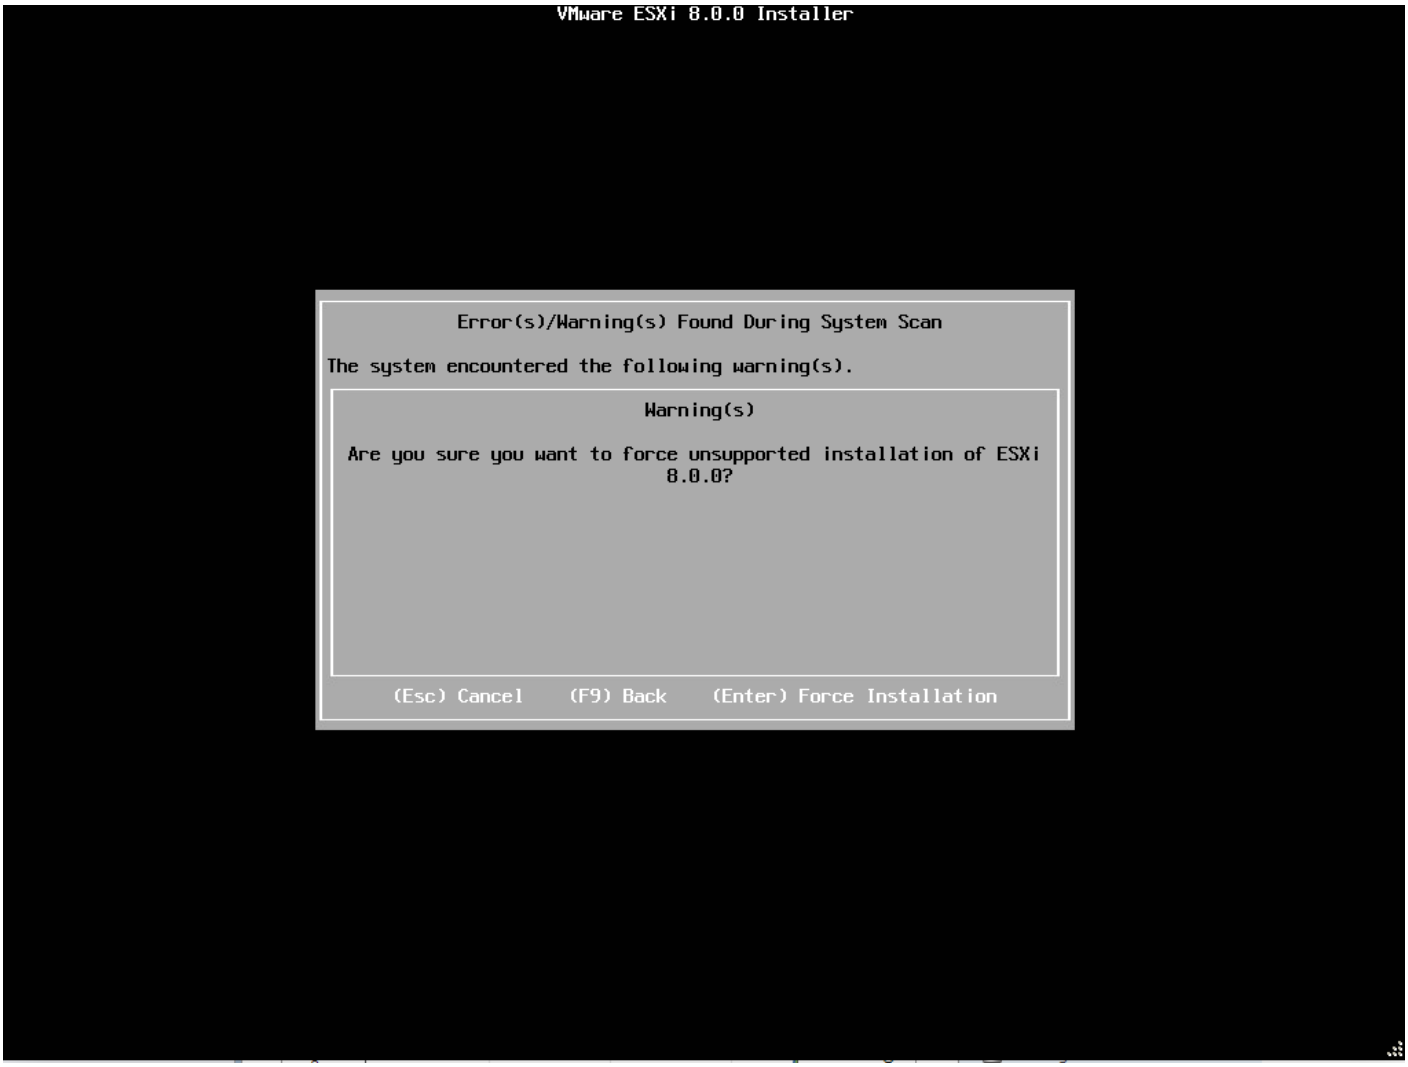

On choisit la langue du clavier.

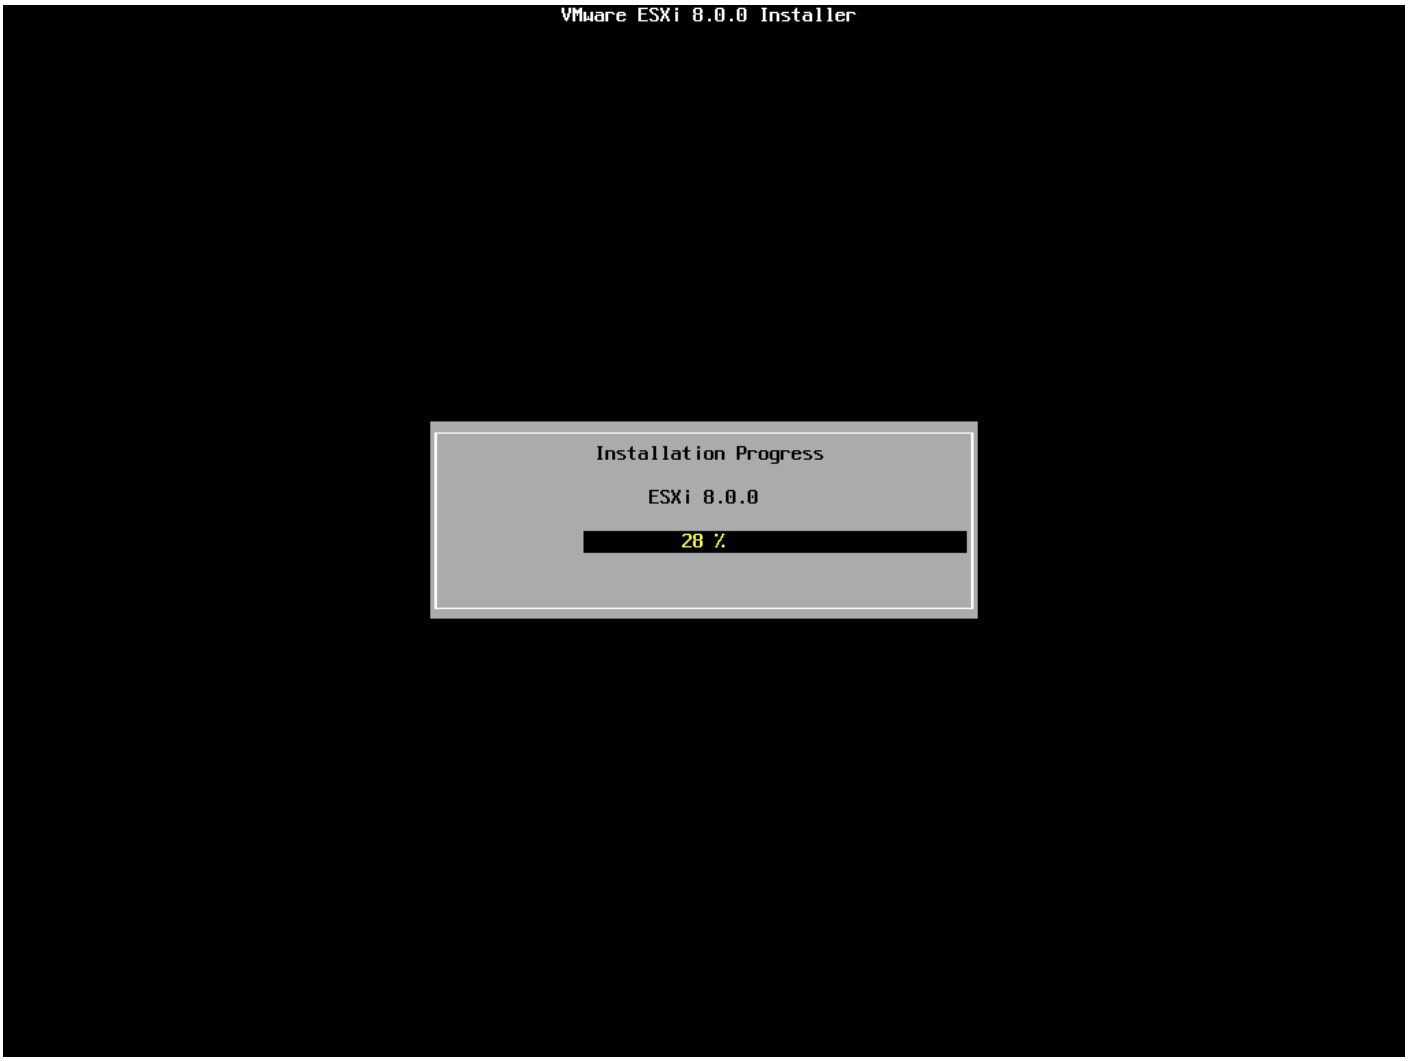

On définit le mot de passe root (administrateur).

VMware ESXi 8.0.0 Installer
Enter a root password
Root password: **********
Confirm password: **********
Passwords match.
(Esc) Cancel
(F9) Back
(Enter) Continue

On confirme en appuyant sur F11.

VMware ESXi 8.0.0 Installer
Confirm Install
The installer is configured to :
- install ESXi 8.0.0 on mpx.vmhba0:C0:T0:L0
Warning: This disk will be repartitioned.
(Esc) Cancel
(F9) Back
(F11) Install

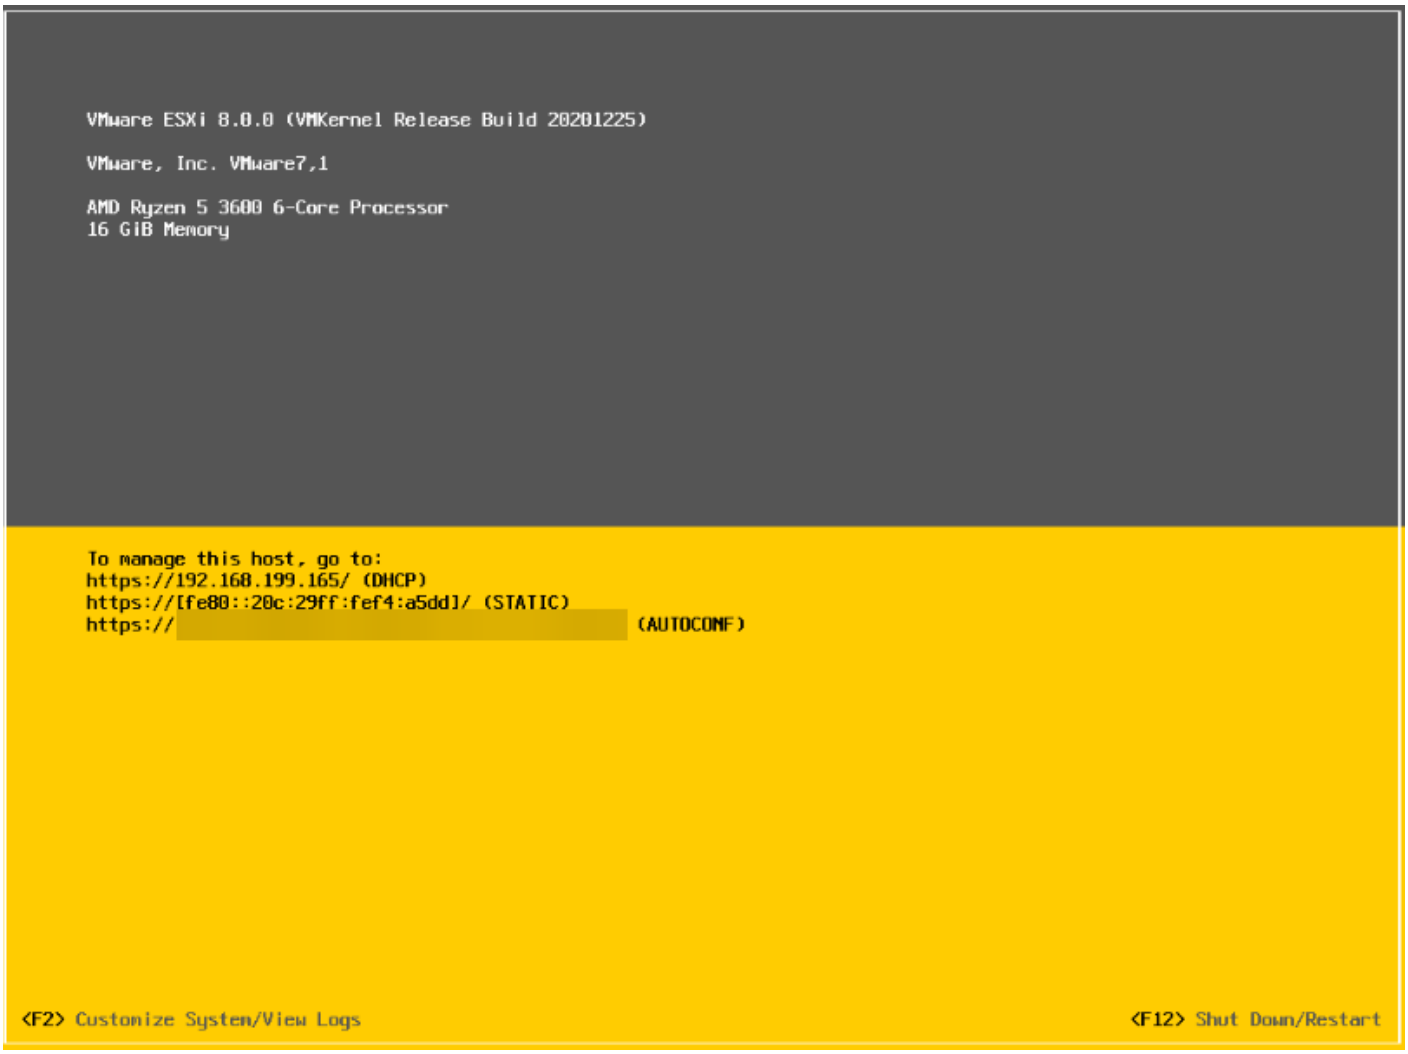

On presse entrer pour redémarrer le serveur.

On peut définir une ip statique, nom DNS et serveur DNS comme ESXi 7.

On rentre l'adresse IP du serveur dans un navigateur et on rentre les informations.
